

Website Building: Basic layout

HTML – First web page

The following exercise contains the following subjects:

- ◆ HTML

Instructions

Create your first web page using what we know so far.

Basic requirements:

- Proper HTML layout with all the tags that are required.
- A title and description tag.
- At least one image with a modified width.
- At least one link that opens to a new page.

We will be coming back to this project multiple times during the HTML/CSS course to implement what we have learned. So think hard of the content because at the end of the course this should be a project you should be proud of!

Here is a small example of what we can create. Please be more creative than this.

Chuck Norris

Don't mess with Chuck Norris!

List of awesome Chuck jokes:

[Joke 1](#)

[Joke 2](#)

[Joke 3](#)

Joke 1

Chuck Norris doesn't program with a keyboard. He stares the computer down until it does what he wants.

Submit the file to Hive.
