Node JS – API's

The following exercise contains the following subjects:

- ◆ API's

Instructions

Choose one of [these APIs](#) from below and implement a fetching from them with:

- **First task** - fetch using **request** module (video 31,31)
- **Second task** - fetch using **https** module (video 42)
- **Third task (bonus)** - fetch using another library (e.g. node-fetch, r2, axios, etc.)

Submit the file to Hive.
